Accolades Continue for LiftPod® Personal and Portable Lift

- *Innovative New Product Wins NECA 2008 Show Stopper Award*

McConnellsburg, Pa. — February 5, 2009 — JLG Industries, Inc., an Oshkosh Corporation company [NYSE:OSK] and a leading manufacturer of aerial work platforms and telescopic material handlers, was awarded the Show Stopper Award at the National Electrical Contractors Association (NECA) 2008 Convention and Trade Show for its LiftPod® personal and portable lift.

The JLG LiftPod is the first portable aerial work platform designed to replace the ladder. The award was given because of the LiftPod's unique design and ability to improve contractor and maintenance worker performance. Its lightweight and portable design makes the LiftPod easily mobile around the job site and convenient for stowage in a pick-up truck, van or SUV.

The innovative LiftPod was selected the winner from nearly 300 exhibitors at NECA 2008, and continues to prove across multiple industries that it is a unique, high-quality product that can change the way contractors and maintenance professionals do their jobs.

In addition to receiving the Show Stopper Award, the LiftPod has been honored with a number of other awards, including:

- *Rental Equipment Register's* Innovative Product Awards - Grand Winner
- *Lift & Access's Leadership in Lifting Equipment and Access Platform (LLEAP) Awards* - Gold Winner, Aerial Lifts
- *Building Operating Management's* Readers' Choice Award
- *Construction Equipment's* Top 100 Products Awards - Lifting and Material Handling
- *Plant Engineering's* Products of the Year - Finalist

"These awards have reconfirmed our confidence that industry professionals are looking for a more stable alternative to the ladder, while retaining the portability and convenience they're accustomed to," said Jeff Ford, JLG Industries senior manager of marketing communications.

The LiftPod reaches a 14-foot working height and is operated using a common 18-volt drill or optional power pack. At 25 percent the cost and weight of traditional work platforms, the LiftPod is a lightweight tool that can be used for a number of maintenance and repair jobs in almost any building type.

Forward-looking Statements

This press release contains statements that the Company believes to be “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact, including without limitation, statements regarding the Company’s future financial position, business strategy, targets, projected sales, costs, earnings, capital expenditures, debt levels and cash flows, and plans and objectives of management for future operations, are forward-looking statements. When used in this press release, words such as “may,” “will,” “expect,” “intend,” “estimate,” “anticipate,” “believe,” “should,” “project” or “plan” or the negative thereof or variations thereon or similar terminology are generally intended to identify forward-looking statements. These forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties, assumptions and other factors, some of which are beyond the Company’s control, which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. These factors include the consequences of financial leverage associated with the JLG acquisition, especially given turmoil in the credit markets, the level of the Company’s borrowing costs and the Company’s ability to successfully amend its credit agreement to provide financial covenant relief; the cyclical nature of the Company’s access equipment, commercial and fire & emergency markets, especially during a global recession and credit crisis; the Company’s ability to obtain cost reductions on steel and other raw materials following sharp cost increases in 2008, obtain other cost decreases or achieve product selling price increases; the duration of the global recession and its adverse impact on the Company’s share price, which could lead to impairment charges

related to many of the Company's intangible assets; the expected level and timing of U.S. Department of Defense procurement of products and services and funding thereof; risks related to reductions in government expenditures and the uncertainty of government contracts; risks associated with international operations and sales, including foreign currency fluctuations; the Company's ability to turn around its Geesink business; risks related to the collectibility of receivables during a recession, especially access equipment receivables; and the potential for increased costs relating to compliance with changes in laws and regulations. Additional information concerning these and other factors is contained in the Company's filings with the Securities and Exchange Commission, including the Form 8-K filed today.
