

JLG to Give Away a LiftPod at IFMA World Workplace 2008

Attendees can enter It's Time to Let Go of the Ladder Contest at the JLG booth #2363

MCCONNELLSBURG, Pa. – Oct. 1, 2008 – Attendees of the IFMA World Workplace trade show in Dallas on Oct. 15 to 17 will have a chance to win JLG Industries' new LiftPod, the first portable aerial work platform of its kind.

The LiftPod combines the portability of a ladder with the stability of a work platform. Workers can use both hands to complete tasks and have a 360-degree range of motion, helping to increase productivity and personal safety.

Show attendees are encouraged to visit the JLG booth #2363 to fill out an entry form that explains why "it's time to let go of the ladder." The winner will be announced on Nov. 3, 2008, and awarded a LiftPod, valued at approximately \$2,000.

"Maintenance engineers, facility managers and contractors can easily transport the three-piece LiftPod that provides the stability of a work platform," said Jeff Ford, senior manager, marketing communications, JLG Industries. "Users have told us that the LiftPod allows them to do their jobs more efficiently and safely, making it ideal for those responsible for commercial building maintenance."

More About the LiftPod

The LiftPod is the first-of-its-kind personal and portable lift available in the United States, and combines the portability of a ladder with the stability of a work platform. With an enclosed platform and 14-foot working height, the LiftPod provides greater stability than ladders and allows workers to move hands-free within the basket, helping to increase safety. The platform contains a work tray to carry tools and materials, increasing productivity and quality of work.

The LiftPod is easily portable between sites in a pickup truck or SUV and around the work site on wheels. Each module of the LiftPod weighs about 50 pounds for simple disassembly and transfer, with a total weight of only 155 pounds. The LiftPod can be carried and moved by one person, and assembled in less than 30 seconds.
